

# 5GINFIRE

EVOLVING FUTURE INTERNET RESEARCH AND EXPERIMENTATION INTO A 5G-ORIENTED EXPERIMENTAL PLAYGROUND FOR VERTICAL INDUSTRIES

## THE EXPERIMENTAL INFRASTRUCTURE

The initial 5GINFIRE experimental infrastructure has been extended to eight testbeds and by links established to Brazilian facilities, enabling remote implementation of experiments by using the 5GINFIRE experimenter portal and addressing various vertical sectors and 5G oriented networking experimentation. For the time being verticals involved are: eHealth, Smart City, Public Safety, Automotive, and Media.

The 5GINFIRE experimental infrastructure can be extended to further verticals related facilities and any other type of the 5G oriented testbeds!
